

Physics 213: General Physics I Summer 2025

Course Description: This course is the first part of an algebra-based treatment of introductory physics. Topics include Newtonian mechanics, energy, rotational motion, fluids, oscillations and waves. Of the courses Phys 107, Phys 211, and Phys 213, only one can be counted toward a degree.

Course Objectives:

- Develop conceptual reasoning and physical understanding.
- Improve numerical problem solving skills.
- Solve problems including kinematic equations, forces, conservation of energy and momentum, rotational equilibrium, hydrostatics, and fluid dynamics.
- Understand wave motion and the properties of sound.

Prerequisite: (Math 121 and Math 123) or Math 125 or Math 261

Corequisite: Phys 223: Laboratory Physics I

Lectures: M – F 10:00 – 11:50 am in Lewis 101

Testing: In Class Exams: Mondays; **Exam 1 6/2, Exam 2 6/9, Exam 3 6/16, Final 6/23**

Instructor: Alexander Denette (pronounced “Den-net”)

Office: Duff Center for Science & Technology Innovation room 440

E-mail: aodenett@olemiss.edu (this is the best way to reach me)

Office Hours: 8am-9:50am @ Lewis 208 **or** by appointment @ CSTI 440 ([schedule through Calendly](https://calendly.com/aodenett-2v6c/30min): <https://calendly.com/aodenett-2v6c/30min>)

Recommended Textbook: College Physics, 11th edition by Serway and Vuille. (eText provided)

Required Materials: Scientific calculator (not on phone) such as TI-30XS MultiView or TI-36X Pro.

Grading:	Pre-class Quiz	80 points (16 x 5 points each)
	Homework Problems	240 points (12 x 20 points each)
	Exam 1	120 points
	Exam 2	120 points
	Exam 3	120 points
	Final Exam	120 points
	In-Class Survey*	20 points*

Total Possible	800 points
----------------	------------

*In-Class Survey serves as attendance verification. 20 pts available as bonus, total pts can't exceed 800

Grading scale:

736.0 ≤ points	A	(percentage ≥ 92%)
720.0 ≤ points < 736.0	A -	(90% ≤ percentage < 92%)
696.0 ≤ points < 720.0	B +	(87% ≤ percentage < 90%)
656.0 ≤ points < 696.0	B	(82% ≤ percentage < 87%)
640.0 ≤ points < 656.0	B -	(80% ≤ percentage < 82%)

$616.0 \leq \text{points} < 640.0$	C +	$(77\% \leq \text{percentage} < 80\%)$
$560.0 \leq \text{points} < 616.0$	C	$(70\% \leq \text{percentage} < 77\%)$
$480.0 \leq \text{points} < 560.0$	D	$(60\% \leq \text{percentage} < 70\%)$
$\text{points} < 580.0$	F	$(\text{percentage} < 60\%)$

Pre-Class Quiz:

Before each class, you will complete a short quiz on Blackboard, due at 10am every weekday. This quiz will test you on conceptual information you should be reading in your book. Reading the book for yourself is a key part of mastering physics. Understanding physical concepts is necessary for correctly setting up and solving physics problems. These quizzes will total about 10% of your final grade.

Homework:

Solutions to short problem sets, worth 20 points each, will be turned in via Blackboard on the day after we finish the associated chapter, by 11:59 pm Central Time. You can write your work on paper and then use a free phone app (Adobe Scan, Tiny Scanner, etc) or a physical scanner to create the pdf to upload. Or if you have a tablet, you can do your work on there and save it as a pdf.

Each set will consist of 4 problems. During class, we will do example problems as part of lecture and practice problems that are led by the class. 2 of the practice problems will be used as part of the homework set, and the remaining 2 problems of the set will be posted on Blackboard for you to individually solve.

You must show **your own work** to get credit for homework sets. I will be posting the solutions to these problems on Blackboard shortly after the due date, so I won't be able to accept late submissions without prior permission – if you have a special circumstance or issue, email me on or before the due date. Homework accounts for about 30% of your final grade.

Exams:

Three midterm exams and a **mandatory comprehensive final**, as shown on the schedule on the last page. The dates of the exams and final will not change unless class is canceled for unforeseen reasons (weather, emergency, etc.). The chapters covered on each exam may change, if needed. No make-up exams will be given unless arrangements are made in advance or in case of unforeseeable emergencies.

The lowest midterm exam score will be dropped, and your final exam score will count twice, if the final exam score is higher. At the end of the term, the Blackboard gradebook will show this adjustment in a column marked "Replace Lowest." which will add on the point difference between your final exam and lowest midterm grade IF the final was higher. If you received a "0" on one of the regular exams for academic misconduct, this policy does not apply.

Exams account for about 60% of your final grade.

Attendance:

Consistent lecture attendance is important for your learning and your grade. Attendance will be verified by in class surveys. Participation is required to be counted as present. Correctly answering the survey will net you 1 bonus point. A total of 20 bonus points will be available, and all bonus points earned will be applied at the end of the course. **You will be able to make up any work you miss due to illness. Please do not come to class if you are feeling ill or are contagious!**

Plan for success:

- **Before each class**, read the textbook, watch the posted lecture videos and complete the Blackboard quiz.
- **During each class**, keep your phone in your backpack to avoid temptation. Try each problem yourself to the best of your ability. Solving the in-class practice problems builds the problem-solving skills you will need to complete the homework and exam problems.
- **Start Homework Early**, begin the assignment the same day we start that chapter so you have a chance to seek out help if necessary.
- **Ask for Help:** This course moves fast. If you begin to fall behind, come see me in my office before class to work on a plan to stay on track. Or, set up an appointment with me using the Calendly link on the front page of the syllabus. Also do this if you need to talk about something confidential that requires privacy.

Academic Honesty:

You may work with other students on the in-class problems and homework, but you cannot copy their work. Make sure that all work submitted is your own, so that you would be able to fully explain it to me or redo a similar problem if asked. Uploading the materials from this class to Chegg, Coursehero, or other cheating websites or using any solutions that are posted there would violate the UM Standards of Honesty. Consequences for academic dishonesty depend on the seriousness of the offense and will be at least a zero on the assignment or exam and may include an overall grade of F.

University-wide Policies:

Attendance

The university requires that all students have a verified attendance at least once during the first two weeks of the semester for each course. If your attendance is not verified, you will be dropped from the course and any financial aid will be adjusted accordingly. Please see <http://olemiss.edu/gotoclass> for more information.

Academic integrity and honesty

Students are expected to adhere to the University of Mississippi Creed and the Standards of Honesty as described in Policy Code ACA.AR.600.001 and the [M Book](#). Students are reminded that cheating in any form will not be tolerated. Performance on all tests and assignments shall represent the individual work of the student. Those who violate the Standards of Honesty will be reported and subject to the appropriate sanction, which may include expulsion from the University.

Intellectual property

All materials distributed electronically and in hard copy in this class are protected under intellectual

copyright. Any attempt to upload these documents to a file sharing service or to profit from their distribution by any means constitutes theft and will be in violation of intellectual property law and the UM Academic Conduct Code unless expressly permitted for by the instructor.

Nondiscrimination policy

The University complies with all applicable laws regarding affirmative action and equal opportunity in all its activities and programs and does not discriminate against anyone protected by law because of age, color, disability, national origin, race, religion, sex, sexual orientation, handicap, or status as a veteran or disabled veteran.

Disability Access and Inclusion

The University of Mississippi is committed to the creation of inclusive learning environments for all students. If there are aspects of the instruction or design of this course that result in barriers to your full inclusion and participation, or to accurate assessment of your achievement, please contact the course instructor as soon as possible. Barriers may include, but are not necessarily limited to, timed exams and in-class assignments, difficulty with the acquisition of lecture content, inaccessible web content, and the use of non-captioned or non-transcribed video and audio files. If you are approved through SDS, you must log in to your Rebel Access portal to request approved accommodations. If you are not yet approved through SDS, you must contact Student Disability Services (at 662-915-7128 or sds@olemiss.edu) so the office can (i) determine your eligibility for accommodations, (ii) disseminate to your instructors a Faculty Notification Letter, (iii) facilitate the removal of barriers, and (iv) ensure you have equal access to the same opportunities for success that are available to all students.

Examinations and last week of class

Regulations governing all examinations — A student's failure to appear for an examination without an acceptable excuse, inability to present valid identification, absence from the room during the course of an examination without the consent of the examiner, or attempting any portion of an examination without submitting his or her answers shall result in failure of the examination. Tardiness beyond 15 minutes forfeits a student's right to an examination.

Final examinations — A final examination, to be given at the time posted in the examination schedule, is required in each undergraduate course, unless the appropriate chair and dean have approved an exception. A student who has three or four final examinations in one day may arrange with the course instructor to take the noon or 7:30 p.m. examination at another time. In order to give a final examination at any time other than that shown in the posted examination schedule, an instructor must have prior approval of the department chair and dean.

Last week of class — The following guidelines exist to allow sufficient time for students and instructors to prepare for final examinations. These guidelines apply to the week preceding final examinations for undergraduate courses held during Fall and Spring semesters.

- During the period of Wednesday through Friday of the last week of class, instructors are not to give exams, tests, or quizzes that contribute more than 10% of the final grade for a class. An instructor can obtain approval of the department chair and dean to give an exam, test, or quiz, of this weight, during this three day period. Instructors should return graded work and/or inform students of their grades on exams, tests, or quizzes prior to the beginning of finals week.
- Exceptions to the above statement are automatically made for lab-based courses, technical writing courses, seminar courses that assign a term paper, and senior design courses that assign a multi-faceted project in lieu of a final exam. Major projects of the above types, which contribute more than 10% of the final grade and which are due during this Last Week period, should be assigned in the syllabus at the beginning of the semester and any substantial change in the assignment should be made known to students before the drop deadline.
