

Update on Computing

- Setup the gbasf2 development environment.
- Started looking at the Dirac tutorial and documentation.
- Following the 2015 summer school tutorial on development by Miyake San.
- Reading the BelleDIRAC components and its functionality.
- Build a container with SL6 in singularity at local system
- Writing definition file for building a container for sl6 with AMGA client and server installation.
- Started discussing plans with Michel on AMGA side of BelleDIRAC
- Goal is to make a protects catalog.
